THE RECOMMENDED DIMMER FOR LED SPOTS

The full range of 230V AC ledspots are direct dimmable to the mains there is no need for any extra transfo's or drivers, only a dimmer is needed. We recommend to use our LEDLAB dimmer 'LLCD IMTR IAC PUSH', specially designed for all 230V AC led's.

Standard connection (parallel) - DIMMABLE (with LLCD IMTR IAC PUSH)
The dimmer is controlled with any open push button connection (open - close). (Niko, Bticino, Berker,…)
